P1: So to be honest,I don't really listen to this too much shortt.... too much slow music. it's kind of boring for me. I was... at least....

P2: And I... And I listen it first time.

P1: Your listen it first time?

P2: yes.

P1: So you understand it? clean? full?the whole song actually? Actually me some of the part I know, I just miscarried some..... at some moment. Because It was too slow and boring and I was feeling sleepy. so....I want you to tell me as much as you actually understand about the songs.

P2: First of all, I just recognize that it's about something.... something science related question or something that was easy but no one tell that it was easy and... so... the singer said that he will want to start from the beginning or something else...

P1: To be honest, it might be because, Myself actually I didn't really....I couldn't actually concentrate totally on the song. Because at some point when I tried to concentrate... I just miss already some of the part,because it was you know.. too slow... it was giving me a some kind of sleepyness actually. so actually I miss some part but as much as I understand.okay that's cheating kind of thing. They shouldn't have done it,but they are doing. So actually I miss some parts to be honest. But yet as . As I actually understand much,you are not totally wrong, to be honest. It was about to get to the beginning of something he is started. That's I know,because I miss some parts,bro..

P2: And the important part was...the important part was the singer said that it was not so hard but it was easy. *Mane kon question*(it means which question..)they didn't said him but it was a.. Actually I messed this part...***

P1: Okay then just tell me, I will find out what was it. just give me the hint.

P2: Actually science related question. But what was his question, I don't know actually.
ummmm....

P1: To be honest, at some point it might actually start with the name science but it look like with the lyrics, it look like he was confessing to someone..you know.
If you saw the lyrics, you will find out that at some point even in first some of lines... well when we actually saw those lyrics for some of the lines.. the actually it didn't look like that he was thinking about anything science or something... it look like...

P2: And...And the singer also said that tell me thee secret or ask me question... Actually he was asking some question and once some *****

P1: To be honest at some points that I understand actually at some point it was confusing.Because you know,,First all of those lines..it was like when you actually confess to someone or something like that your ex. You know your ex girlfriend or someone like that. So when you confess, you say him something like that. You know, he

was asking for like....what can I say!!! It was like he wanted to meet someone and then apologies, and that's kind of staff. But at the end... when. at those. middle of those lines. It actually get more confusing. because at some thing about science, you know questioning, puzzless.So, then it come to mind that it was, it could be about science.. but

P2: There is breakup song type.

P1: Yes, it's kind of break up song type. or something like that..because...

P2: Singer said that “tell me that you love me and h**** me” *Mane Hasho*(it means laugh).

P1: To be honest, How come science can love you?

You have to love it. Because Science is...

P2: Actually, Science related all the things.

P1: It wasn't totally science related. In my mind, actually I think it's not totally science related.

And To be honest it's a tough thing to.. you know...

P2: inter Science.

P1: That's other thing. To be honest it's a tough song to even actually topic, tough topic for us.

Because I...This is the first time in my life I really heard that song and I am not really big fan of slow songs. I tried sometimes,so it's boring for me.And this one, it's poem or complicated actually.It might be slow for someone who want to learn by actually watching lyrics or listening, you know speaking -listening thing, it's okay for that.

But when you come to you know, discussion about a song, this is not the right kind of song for you know who is listening it for the first time like us. And you said it was your first time listening this song. But yet you had a good concentration their.

I am not joking, that's a huge achievement to be honest. Because giving that much concentration on this kind of song is hard actually. Even with the lyrics its...itss began..

To be honest when I saw the lyrics it began more boring. You know when video comes you give a concentration and listen. Because video,it gives us something interesting to see actually.when video songs, I mean the main official song, video,you get something to see you get. You know, concentration on something you are watching what is there,you do understand by watching the videos.

P2: watching the videos... yes yes..

P1: To be honest Most of the songs writes to understandd by watching the videos with their body language.what they actually trying to do?But there is no videos, only lyrics & I am not that kind of guy who actually watch the lyrics first..

P2: ***** I think it's related, You said that Charlie Chaplin's movie that there is no voice. But we can understand what hi is... *****

P1: Yes because body language is very very important thing to be honest. You know , Mr. Bean. They **** about talking in his movie or something.***** In his movies he doesn't talk.

P2: Come to the point.

P1: Okay, So the fact is because it was lyric,it was hard. But as much as I think the whole lyric in my mind it's look like first it was confusing, It said before that. It look like a breakup song or something like that. But in the end it's look like*****

P1: And he said that..he said.. singer said that “don't shout loudly on my heart” or something else... actually he was very sad... something for breakup.

P2: Okay, if it actually related to science, not break up then my opinion. I mean my own opinion or my logic is that it was about you know in the hardest topic of science where you can't just concentrate. You know, you will try to be the good at that but sometime you made mistakes, so about those mistakes apology might come.

Because of those mistakes and then because of the complex part of Science. It's possible that....

P2: If you miss...miss miss something... blast or*****

P1: Yes... No he said, there is something that so much complex that it can't even get through your head like the song.

It was kind of thing that I thing if it was actually...you know based on science then definitely it was about this complex part where he couldn't actually understand. he tried so hard, I mean his, he tried his everything. But at some point you cannot understand, that something you cannot. So it's out of his hand.

P2: Actually the singer wants to impress..impress.. express her..

P1: emotion actually.

P2: emotion through science.

P1: And for that, you know for that.. misfailure that he couldn't actually accomplish those things, so it might come a, like a regret for him. So, that is possible actually. And there is other logic for me that I, that if it's not actually about scientist or it's about his feelings. Then it's definitely is actually... okay now There is one thing I think can possible, it's about scientist not science. right?

P2: Scientist.

P1: Scientist. Then it's definitely someone who was a scientist. its possible because you know...

P2: There's no time for his girlfriend.

P1: he is busy actually..

P2: he is busy with some experiment

P1: The subject here was it was for someone who was related to science or scientist. because he said apologies. May be it was like someone tried to actually discuss about him something that it was out of his head. Because something you cannot understand.It is very normal. So the possibility is that there was someone, his girlfriend might be or even his friend... any thing...

P2: No its not girlfriend.

P1: His girlfriend is actually pretty much logical, more logical than anyone.

P2: we saw that...*****

P1: So my logic is that,, my logic is that. The singer actually, it was for his girlfriend or someone like that who is a scientist or related to science. So, they might have some misconception, misunderstanding about something or...you know scientists have a problem that they always actually concentrate on their subjects, experiments, their logics their own theory. Actually they live in their own world.

Just Suppose, You are a scientist and you have a girlfriend. You actually not suppose, I don't think you even watch over your girlfriend. You want to get the time.

So it was like may be they had some kind of fight because of those types of thing. that's why it was like.. it was like that he tried to understand, he tried to get into the hard world. It was like that. he tried so hard to get in the hard world. But in the end It wasn't possible. Because we are not like similar. People have their own things. You know, we are not supposed to be perfect on everything. So it is possible that he tried but he failed.

P2: And his girlfriend wants more time from him.

P1: Yes something like that. It was like he tried so hard to actually, but he failed. Stay with the same line as his girlfriend or whoever he is actually indicating.

P2: And Result, he wants start from the beginning.

P1: he tried hard everytime, he might be failed. so it was like start beginning. He can't even shout. That's why,, you know scientist is very complex things. So for the scientist specially its hard.

So as much as I think, this the logic for me. so, I think That's it. so what your logic? what do you think? what's your opinion? Its opinion, it's my personal, what I know ****

P2: My opinion is...

P1: there is one thing, If I saw the video it would be easy for me. let's for the your opinion.

P2: You said all the things.

P1: So, you are actually agree with me. That's the same thing actually.

P2: Actually we two same together.

P1: yes,so it was our first time listening a song that was boring.

this is very, this is very boring to be honest.

this is very boring for me.....

P1: Hello, I am Murad. Good morning Rifat.

P2: Good morning. I am Rifat.

P1: Today our topic is three items. But I am select literature.

P2: what is literature?

P1: Aaaa...I

P2: Do you love liter*** to read literature?

P1: No, I don't love, But I...I...

P2: ***** Whenever you get times you want to ***** just some literature..

P1: Sometimes, I was free time then I read books. Maximum books like that Brishti bilash, ma, then..... kobitar books... something like that

what about you?

P2: Is it in list in your likes...

P1: No, but it is interesting... like...that, interesting, but our life effect,, not effect that.

P2: At first thing the verse thing literatures can great....have great influenced in our life. It inspired us, we can read so many literatures, like social impact or brings our life, brings our refresh. That's it, but it makes us happy. but whenever you read some literature we feel them....we feel.... we know many things in literature. I would like to read literature whenever I get time, whenever I get free time. I read so many literature. Normally I read.. normally I read bangla literature. sometimes I read also English literature. that's it. It makes me happy. It makes me happier. it inspire me. It has some great sort influenced me in my life. that's it. Did you hear about Nuclear Anchi..

P1:..... *****

P2: you didn't hear..?

I pretty much hear about nuclear anchi. Nuclear anchi is a great source today's scientific equipmentss...Science world modern world. Currently modern world, modern countries.. they have,,..... they can so many benefits.... they can earn so many benefits... they can earn so many benefits... but it has a bad effects.. it has a bad effects on today's world. Many of you know about nuclear missile. It happened in world war two in Japan Hiroshima and Nagasaki.

And..... many people had died..

P1: Okay I don't know which country is create.?

it's nuclear.. it create?

P2: Basically nuclear made from the uranium. Uranium first....*****appeared in world war.

First Germany wanted to make it.. And by that time the great scientists Hygen burg.

But Hygen Burg was failed to made it for some reason. But that time the aquomedical Scientist, he was able to make it and made the nuclear missile.It was bad effect on the world. basically effected by, effected to the japan.

P1: As far I know nuclears... I am not sure...

it createss America, Iraq and Japan. I am not sure. please clear this doubt.

P2: Basically the most powerful nuclear come from America. Then Russia and China is the most powerful nuclear energy country.

P1: China?

P2: But, some countries, they had nuclear power. They are also nuclear powerful country.

Because they have nuclear missile. It is so harmful because it can destroy an whole country.

But you want to know that Iraq and??

P1: Iraq, America and Germany.

P2: Iraq, America and Germany. They have already nuclear power. Nuclear power... But also Pakistan, India, Israel.. to be free..

P1: and many other countries..

P2: And many other powerful countries they also have the nuclear power.....that's it.

But without a nuclear energy, without nuclear missile but the.. but nuclear energy have declared in our... awkward.... ****

P1: What do you think? what do you think Bangladesh interfere of this nuclear sight?

P2: No,Bangladesh had not the abilty to built a Nuclear missile. But Bangladesh, but recently Bangladesh do very well in nuclear field. Already bulited the Rampal Nuclear Farm. And they are willing to make another one. And in future Bangladesh *****. In our modern life Nuclear energy is a great source for make this world more modern.

P1: Bangladesh have many other science technology and so many. But I think as soon as possible Bangladesh interfere of this project.

P2: which project?

P1: Nuclear assignment.

P2: As you know that, Bangladesh has a nuclear energetic cell center, besides Dhaka University. In Bangladesh it is new subject. But they are pretty well and they will be in future in this subject.

P1: The song is meant by about the life struggle, Sometimes about people how much they struggle in life. They just think about that every kind of situation when a person will be depressed or sometimes doesn't walk like solid way, A walk he wanted established proper way can be properly establish that thing. So the thing is when we feel much depressed, we should bebe try don't be lose hope. we should try and try.

So the song basically mean like, the line one line is like” Nobody is easy to me “ or something like this type of thing. So this sometimes meant by the people who will left their work by let their ambitions for something that he can't be doing right now. Can't do the things not be going this of way. So the thing is he should be focus on it more and more. when he focus about his life, struggle everything when he aroundingg the thing. He should be think that he can do it. Like a scientist tried, failed lots of time. but establish look a scientist is always being trying more and more the thoings with more science equipment with lots of thing. The song is surrounding by that what we ever learn in this particular situation in whole life, we should more overcome those situation and take those things by learning such equal way and try to focus on those thing whahat we really want. Like such kind of thing, I want to be a flight attender, lots of people think that this is not happening by me. Because Almost every girls attend as flight attended. The girls are always being chosen accept behind the boys. So the thing is If I will think those kind of mentality, if I will born on those kind of mentalities, I will not be properly involved on those thing. I have to focus that yeah, boys also can do those kind of thing I think do it more. So what we should do, we should be..... I should be, what I do, I have to be more focus, I have to be think about how can be I produce those thing. How can I recall those thing and morely when my parents not allow I should be try to more and more. we should try to think like a scientist is always reproduce new and new eligible thing, new many thing. We should be always more innovate the thing that we can reproduce something very unique than others. That should be we have to done. Because if we fail in and accept and sit down like a coward that's not happen in our life. We should be ***** ourself more and more the way we can take us into the next level or next generation. Because you know, this thing is changing by your age getting more and more. And if you have to reproduce yourself like a man yoi should be more establish, you should be more gentleman and produce anything like u got. So tell me about something about your ambitions or your circumstances. tell me, come on...so tell me about something, Like I will ask you if you are feeling nervous. So I will ask you, just answer the questions. What is your Daydream, like dream?

P2: To be is a Successful Businessman. But unfortunately I come in the engineering. But in the

future I get any chance, I will start my business. If started any broken then I will work too hard in my business. But I can't stop my business. Because it's my dream and it's my target.

P1: So what you think about the song, the main sum of every kind of life that who are really depressed about became not successful and he cannot tried and tried in his life, more and more and right now he is gonna be successful. If you have any idea this kind of people that who get much of try, after that he get successful. If this of thing happened on you, how can you overcome this thing? like how can you produce yourself more for the thing?

P2: It's only depend on hardworking. yeah but do not hard working if you cannot success.
So I think if you very much hard working, you will get your success.

P1: So, Do you think the song like a scientist, is there some kind of thing that people should tried more. If he get more need to overcome his weakness like, lot of people lot of weaknesses coming in side. So do you think this song somewhere help those kind of people after listening those kind of listening and other thing?

P2: Obviously, this song inspired us. This song a scientist story. Scientists are always hard working. they are not...

P1: They are not like someone lazy but they always take their time in lab and always experiment thing like this kind of thing. So the song is basically that people cannot hard pledging the hard thing more **** like people doesn't love this.

P2: Every man's life have broken but this broken is not a long time. it is very short timer.
This broken is overcome all of people, they are going to success.

P1: Last to mean I will talk something there is a lots of time that our parents like jealous, do this thing, do engineering, do lots of thing, that do doctor. become a doctor you get successful. We know that our parents always want to be a someone established and successful person in this generation. But other this of thing don't you feel that we have something expectation that we can done in recent passed situation, in future. We can do yet what we would love to do. How can you tell about this thingss? Like you want to be businessman but you are in engineering. So do you thing that after the thing your parents

will allow the thing you get businessman ***** or you parents will support? Or parents doesn't support? so how can you report it?

P2: I start my business after my graduation. Then I will very hard working in my business. In Sha Allah I will get my success.

P1: what kind of business you really want to do?

P2: Many other choice.... But I like that Hospital business and Restaurant business. i think it's very successful and money *_*****

P1: I want to tell one thing that in this generation, in this world, one of the most creative thing is Businesses.

P1: I want to start with an action, you know the crime is happening..

P2: Because it's a short story. We should happen it

P1: it's okay we have to turn it on. We can stop that. In December evening.

P2:..

P1: okay don't add name now. I want it to be show case when we will get to the detective. You

understand it? I want it to showcase we will get to the detective. we don't know the victim here..the name.After he is gone missing, The detective and he will get the name, and he will search for him. So I want you to.....So it was a cold evening. A guy was walking thorough the quite back alley. A guy was walking through the entry street of back alley. Okay, I don't need to write, you can write it. We will discuss it. one will be okay. okay through the back alley or something like that you know quite palace.. P2:..... *****

P1: you just said about the 4g right? and before we started this recording?

But I don't know anything about 4g. So let's just move on to some another topic.

P2: okay no problem.

P1: I don't what can be said, you know...

think about technology around here at Daffodil University.

P2: no. its fine.

P1: What can we say? or write? you know....

okay I remembered something. Last month I have bought some parts of the computer and assembled it.

P2: okay.

P1: So there is a bit of technology.. recent technologies... like I bot, the graphics card of 1050TI.

May be we can add the specifications also of the whole computer thing. And I,... you know clearly remember each and every part of the computer. So we can make a conversation like there is a buyer and a seller. So the seller,,, the buyer wants to buy something for his office... you know own mmaking like....Okay let's just write it down.

P2: ***,....*****

P1: No, one will be enough...

P2: okay.

P1: I think. I don't know. because we didn't carry out the whole thing at the last classs so let's write down.....

so who is first...? the buyer or the seller?

P2: seller

P1: seller? no. I think the buyer went to a shop.

P1: at first seller come to the shop.

P2: No,seller is the one, who is the owner of the shop.

P2: oh yeah yeah..sorry.

P1: its okay...buyer.

what can we say? Asslamu Alaikum?

P2: yeah, it's fine

P1: Assalamu alaikum. How are you?

P2: yeah....then the seller.

P1: the seller. yeah.. he replies back "Owalaikumm Assalam. I am fine. What brings you here sir?"

P2: then buyer.

P1: What can he say next?

P2: I need some.....

P1: You know I built the PC. so he can just say like, I want to built the computer with some specifications I have made.

make it a... you know it's not realistic I think. It's getting innovate artificial. But I want to make it original.

P2: original.

P1: So can you give me some, you know.. the finer details of a conversation?

I am not getting, you know any thing...

P1: Okay the first thing we have arise alien. Okay the summary is already a summary. but yet we have to make it a even smaller than it is. its hard. Okay the first sentence is there are strong possibilities that alien may exist. We never saw them. but they might not look like that...how we think them to be. The universe is massive.

P2: yeah it's probably.

P1: ***** Universe is massive. so they are suppose to exist and we can say we believe they exist.

P2: okay..you...

P1: the next one is....*****

P2: we can make it.. many people can't donate....its called blood phobia,himo phobia right?

P1: yes.. yes himophobia.

P2: Many people cannot donate blood due to himophobia. Some people can't tolerate a small portion of blood. am I right?

P1: its gonna be like, Some people can't even tolerate a small portion of blood.

P2: yes. we hear that blood types affect personality.

P1: Yes, there is a strong that blood type affects our personalities.

P2: what is your blood group?

P1: To be honest I don't really remember. The last time I check it was like 3-5 years ago. I don't remember.

P2: you should know blood type.

P1: you are right. I really need to do that.

P2: okay.

P1: Okay the next, next one is climate change. Actually that's a very common issue currently.

Okay now let's summarize which is already summarized before. hard one actually. okay.

P2: let's try.

P1: let's just try this.. Climate change is most threatening issue of our current time.

***** indirectly and directly.. its

.. what can I say?

P2: Causing

P1: Its causing all the natural and non...non natural... it's natural and man made disaster.

okay the next one is diamond. you should go for it.

P2: Okay..let's me try. Have you ever seen the Blood Diamond movie?

P1: yes I saw that. I still can't imagine....I still can't believe it didn't really made to the Oscar. I don't know How did it really missed it.

P2: The last scene was so..

P1: yes, it was so touching. I normally dont get actually emotional. When I saw the movie but it was really touching.

P2: Yess I thought thatt It will be....I thought that Daniel Caprio Will get Oscar...

P1: Leonardo De Caprio.

P2: Oh sorry „Leonardo De Caprio

P1: Yes but the problem was there was also some great movies when this one released. So that why it may. It actually released way too far. atleast earning error two year it might get.

Okay let's get to the main point here. okay diamond

P2: Diamond is the most precious metal I think.

P1: most precious metal in the world actually

P2: its not affordable for everyone. it's for rich people. rich people only buy this.

there is blood diamond. which is actually,, what I say... Illegal international market.

P1: which connected to..

well its gonna be like, there is a blood diamond which is illegal in international market and connected to civil war.

Okay that's a great point. okay lets get to the evolution.

P2: evolution.

P1: thats actually the most heard evolution, gossiping evolution. Actually I learn this. I can say whenever I was ten or eleven years I actually heard this.

P2: It was on our book also.

P1: Yes, in our class 8 and 9.

P2: Physics **Shadharon Biggyan**(General Science).

P1: Its general knowledge which was. But it was also in our book biology. And also in our normal book from class 7-8. So it's really known theory. Okay, the evolution, let's start the summarizing. the theory of evolution is a initial and puzzling theory. Because it's not even confirmed. So everyone is confused. Like half of them are in two groups and they are actually still fighting for which one is correct. kind of that. okay let's back to summarizing. the theory of evolution is a initial and puzzling theory. It happened for survival of evry living being. there is a confusing theory that says human came from apes.

P2: yes... the other scientist.

P1: Okay the summarize is infare. so what we are gonna say is conversation. So it's not the part of the summarizing. okay. well I personally don't believe that theory. it's not even just me. it's not just me it actually most of the scientist they actually don't really think it's right concept. the fact if we really evolved from ape's, then apes were not supposed to be in the same time period we are actually running. so it wasn't possible. And if they say it was happen in different religion. to be honest, the theory of evolution with their own logic, it doesn't work like that. A theory works in a long period of time. Like millions and billions you can say that long. And the climate is not like it's gonna change one part in a massive way and the other one is... we don't live in a different world actually, we live in the same world. so I don't think actually it's even possible that one ape changed and other one is continued in the same place. it's not possible. Besides the apes for the some theory that human actually came in the.. I think like million years it's happened... I don't really

remember. But the fact was the apes were already in that time and they were still changing. But even apes are evolving. But it's not can be the change like this but you can see one thing that it is true that our gene actually matches like more than 90%. but you know the evolution, there is a rules. you can't just change one type of apes and other type of apes still remain. That doesn't work actually. So I think they should actually think about this thing when they made this kind of conception.

P2: Actually, some scientists thinks that, actually believes that apess and human connected because of some similarities have apes and human. Like they are moving their hand.

P1: that's true that we have similarities. because you know, apes have a very usual habit, they actually copy everything they saw. that's same with the human child you can find it. And it's not just for them. It happens for every animals. But the thing is for human and apes it's actually a bit more than usual. so that's why they might. It's possible that they have some similarities but it's not possible to roam in same time direction.
So I think that's enough...

P1: Hello, I am Humaiyara. Today's our presentation topic is about hip hop literature and nuclear energy. Literature is the part of a, literature is a type of write. In our country, there is a lots of (literature er, *shahittik* er English *ki*?) writer such as Zohir Rayhan, Humayen Ahmed, Manik Bandyopadhyay etc. I like romantic and horror literature. My favourite literature is Humayen Ahmed. He wrote many literature as like as Shonkonil Karagar, Ajrobbar, not only ***** in our subcontinent, there are famous literature such as *Bishwakabi* Rabindranath Tagore, he wrote many literature as like as Raja Rani, Chitrangada, Chitrananda Saha etc. He is a famous writer. I also like his literature.

P2: My name is Taki Hossain. And let's talk about literature the topic our teacher given. This topic is all about is listening . We listened it and now we have to make what we understand from that topic. So, we have to talk about that topic. So, literature for me, literature is actually important for us because if you want to learn more, if you want to know more, you need literature. If you want open your mind, open your knowledge, you need literature. So, I live in a country where I saw so many writers, so many amazing writers, brilliant writers. They.. ***, I wrote some of them, some of them books and for me I learned a lot

from them like.. like if I talk about Jafor Iqbal because I like science fiction books and Jafor Iqbal books are amazing. They are pretty much amazing because what he writes about, what topic he writes about, he just...he just wrote that topic very interestingly and so that we can understand easily. And so that we can actually, not only understand that topic but also we can think about that. So, for me science fiction movie, science fiction topic, science fiction writers, they are actually should be interesting. So that we can easily find what topic it should be and we can like, after read that topic we can like think ourselves about the topics. So...and there are so many poets..poeters and lots of and other writers. So thats how what I think literature is, thats what I think literature and everybody should try it because it inspires you, it makes you feel happy and makes you feel sad like and it doesn't make you depressed. So you should write more novels, articles , writer's books, so that you can open your mind, open your knowledge and I think It's important. That's it I know about literature.

P1: Today's ext topic is hip hop. Hip hop is the form of dance. It is the based on America but nowadays our countries people used to this form of dance. Not only our country but also many other countries use this form of dance. Many famous actors, many famous singer used this form of dance. I also like hip hop dance because It's really very awesome form of dance. If your mind is very bad, you can use this form of dance, your mind is a so much fresh to hip hop dance. That is...Thank you. ***Amar to Bollywood chara... Ami to hollywood kom dekhi. Bollywood chara to ami Hollywood kom dekhi. Amar...*** I like Tiger Shrof, I also like Ranveer Sing...He is the dan***.....Tiger Shrof and Ranveer Sings dance form is very very very. I like their dance form.

P1 : Let's start with your very first presentation.

P2 : Ugghh.... First of all..... ugghhh.....

P1 : First yours...

P2 : ugghh.... I'm sorry. First yours...

P1 : Okay. My name is Sanjid Hossain Opi....And.... I'm in 1st semester.... and also in HSC 2018 batch.

P2 : Okay.

P1 : My dream is bit different. It's.... I.....My..... it's kind of my goal too. My dream of my life is to... is to travel the whole world actually. That's a unique one. That's why I'm working so hard. I wanted to see every place possible Before I die. I know there's a lot of place in this world

that I can't.... might.... I might not be able to travel but in the end there's a lot of place that I can go. So my dream is to go every place as much as possible. That's what I'm ugghhh.... actually working for. That's what is my goal. I wanted to see.... I wanted to explore.... I wanted to see everything that is in real actually.... we saw.. we saw so many things in TV in Internet but seeing things with your own eyes is a bit different. So that's my dream.

P2 : Can.... can I ask a question?

P1 : Yes you can.

P2 : This is your real dream?? This is your real Dream!!!!

P1 : Actually..... Yes...This is my real dream. I'm not faking it.....That's my real dream.

P2 : As.... as... my teacher give any away....

P1 : You can use bangla. If u stuck

P2 : **Jehetu sir bolse je icha korle dream ta Toiri kore nite paro akhon. Oi hisebe ami Bollam arki j.... (Because sir had told us That if we want we can create our dream Right now. That's why I have said so....)**

P1 : Thank you. But actually..... I don't really feel like making a dream and I'm proud of my dream. That's why I don't want to fake it. I want to actually expose that. People should have their own dream you know.....we... we had actually aim..... target.....aim is a different thing and dream is not same thing from me. It's actually different. Like your aim....You wanted to be a doctor or wanted to be an engineer. That's your aim! You wanted to be that. But dream it's not the same thing, it's something like it's like an ultimate thing that you work for.... it's hard. Because you know.... you aim..it's sometimes it feel up.... you wanted to be a doctor.... you end up becoming a doctor one day. Then what? That's not actually a dream. That's an aim. You actually complete it like a task. After that.....what??? It doesn't end..... in the end you know that there is something else that you always wanted to do. That is your dream. So, tell me what is your dream? Now.

P2 : Okay... My name is Salim Reza from ****

P1 : Actually you are in our section????

P2 : Yes yes.

P1 : Is that your 1st class?

P2: Yes....

P1 : I have never saw you before.

P2 : No. It is my 3rd class.

P1 : Okay.

P2 : **Ha (yes)**

P1 : Then I'm sorry..... I'm sorry about that. Let's talk about the dream.

P2 : My dream..... uggghhh..... was different because..... every person can't.....
uggghhh..... can't absorb his dream.....because.....

P1 : It takes time actually.

P2 : **Ha (Yes).....** yes yes.... uggghhh... generally.... generally..... **mane (means)**

In children times..... I.... my aim is I wanted to be a doctor. But.....

P1 : That's your aim actually.....

P2 : yes yes.....

P1 : Some people make it a dream. You can make it a dream also.

P2 : It's my....it's... first of all it's says that.... It's the..... uggghh..... it's a it's mother's
dream.

P1 : Okay.... I get it.... You can use bangla.. Don't worry... you can use....

P2 : No no....I want to..... uggghh....(laughing)

P1 : In English..... I get it. I get it!

P2 : (laughing) I'm from **** it's outside of dhaka..... but I can't.... as far I
can't speak English influently....

P1 : No. That's ok you use bangla that's why I'm talking.

P2: No. But I'm trying.....I'm trying my best

P1 : So one question if I can ask... if you don't
mind?

P2: No.

P1 : Okay.... So you said becoming a doctor
was your mother's dream.

P2: Yes

P1 : Most of them. My mother wanted to be the same. Even my family..... they still trying. Have a way if that's possible but I don't really wanted to be that. Because I don't like that. I mean..... you know...Becoming a doctor is like.... like a prison life kind of thing. So it was your mother's dream. So what was your dream? Was that was same thing?

P2 : Actually..... Actually it was something....

P1: It was you dream too...

P2 : But for that after SSC examination..... Ugghhh.....I have.... ugghhhh.....

I have good marks..... ugghhh.....I have got good marks..... and for that...For that I wants to be..... I wants to go in Dhaka. For admitted..... ugghhh..... a collage..... ugghhh.... from science.

P1 : So there is something I want to ask. If you don't mind . Now you are in CSE.

P2 : Yes.

P1 : So, suppose..... aahhhh.... it's not suppose it's the reality. So now you can't be a doctor. It's like breaking a dream for you. Because you never observe a dream actually .

P2 : **Ha (yes)**

P1: Or it was your dream. So what is your current dream ? You have to made up one. For....

P2 : Actually.....

P1 : For going on in life. Everyone need a dream actually or a aim, Whatever you call it.... So what is your current....

P2 : As my dream is broken now.... now..now I'm trying my best..... ugghh...with the other sides. Because..... ugghhh...one kind....ugghh...

P1 : That's what I really wanted to know.

P2: **CSE te vorti hoyar main uddesho hoche..... jehetu bortoman desh o bissho technology nirvor ebong amake valo akta kichu korte hobe ar... next target hoche.....**

(The main reason I got admitted in CSE is... . because now a days our country and world is dependent on technology . And also have to do something good. And my next target is.....)

P1 : Yes. Actually you are right. Our current generation is fully dependent on technology and CSE is actually on if but of rising. It's a big chance for us to. But you know if you choose... as this... as a way of going rise up in your life so..... in suppose.... you are now..... after four years you are done your CSE. You are become a engineer now. So, don't you think.... you need something else to do. There's a ultimate thing.... from my perspective. Dream off life is.. is not an aim.. aim is like an way to reach your dreams, and dream is something you ***** always for your life. You always want to have that thing. That is a dream. So there have to be something ultimate..... ultimate aim or target for your life. That's is something you can call dream.

P2 : That is my ultimate aim is as I gotted I Admitted into Daffodil international University and CSE.... ughhh.... for... CSE ugghhhh..... I think four years.. After four years.... I want to be a Engineer and I got a good marks for Getting scholarship and then after I'm Trying to go abroad to get a good job And then..... I don't require money I want to always....**Sob somoi***** (always..... *****)**

P1 : Scholarship?

P2 : **JI [yes)**

P1 : Okay I get it. Actually you actually trying To get a scholarship.

P2 : Actually most of us.... we are trying to get any scholarship. You know..... for CSE abroad is actually the best place for higher education and also for the job sector. It's in outside Bangladesh it's very big market, job market for CSE and for me I actually..... because this conversation is about dream..I want to share something with you. So far I observe something about most of the people they Don't might..... they might not know their Dream. In the end the dream...most of the most of the people our country their dream is to live a peaceful life well.... they can live easily.... they don't work through. You know... any kind of problem. They don't face. That's most of our Bengali's dream. That's why they want to work hard. Because in our country you want a peaceful life... you need a lot of money. So that's why people want to get as much as they can. That's in our country. That's a common dream. Sometimes most of the people they don't get it until they find it. And at the very end they learn what they Looking for and their is something about dream if you don't have a dream even if you... suppose like you have a very big company you have millions of money but doesn't have any dream you would be depressed..... because.... suppose you have like a million dollar and you don't know what to do with this....?? you are and you have been working for this dollars like for a month!!! You are working so hard! But why? What?what wil you do? You Never actually thought. But you are Working for that job. That's something like a empty cell you fill like. That's the problem we all should find a dream. At least we should trying to find out self that what we really want that is dream actually. So you ever thought that what you want in life that is your dream.

P1 : Yes.

P2 : well currently what you want in life, what You want with your life? What do you want? That is your dream.

P1 : **Ami bortomane jeita chai ar sobcheye boro kotha hoche je jokhon choto chilam tokhon chaoya paoya chilo akta ar akhn onnota arki. Mane life ta jototuku amra sohoj mone kori asole life ta atota sohoj na. Life ta sohoj vabe nile onk sohoj ar sohoj vabe na nile onek kothin. Ei hisebe bortomane ami sohoj vabei nichhi.... karon (now currently what I want..... and the major thing is when I was a child then my demands were of a type and**

now they are of different type Actually life is not that easy as we think of it. So, now I'm taking it simply. Because.....)

P1 : You know about dream. If you don't get it..... for example their some people Who wants to live their whole life with Their family. You know.... that's their dream. Because they are working hard for their family. So, now I'm observing you for sometime.... it's look like it's kind of same. You want to live with your family a peaceful life.... isn't it right?

P2: No

P1 : So, what do you want?

P2: Mane family er sobai k chere dure Kothao jeye valo thakbo ta (it doesn't Mean I want to stay good some where far away by leaving my Family)

P1 : I'm saying the same thing.... I'm saying The same thing actually. Because I saw...

I learn that your dream was your mother's Dream. So this is very easy to understand that you want a happy life with you family like living with your whole family. I think that's what you want. Don't you? I mean you want to leave with your family. Don't you?

P2 : No. Sobaike chere alada thakbo ta na. Kintu Protteker e tw alada alada aim thake.

Oneker e hoitoba vetor theke jinis ase...Choila ase j ki korbe. Oneke hotat

Decision nei. (I don't want to stay away By leaving everyone but everyone have

Different dreams. It's come from inside Them..... it comes that what they want to do.

Many people suddenly takes a Decision.)

P1 : The sequels is start with hiphop

P2 : Okay. I'm not bog fan of hiphop but as much as I know about hiphop... it is
actually not very old category. It's kind of new... I mean..... not many new but a
bit new because it wasn't really famous in old generation. Like 90's..... It came
after that. So, you know... most of the people from... ugghh...

P1 : 20 century..??

P2 : Before 20 actually..... the old generation
they are not interested in hiphop.

P1 : But it's famous..... famous....

P2 : Famous at first in young generation. At first they thought it was like a you know
common trend.....trends that was actually suppose to...you know..... get out..... to place
and... get out of the.... you know... the trend...but the fact actually changed.

P1 : Frist time it was.... First time it was just a trend but... ugghh... but.. but it was...but it
is a culture of America.

P2 : Yes. First they thought.....

P1 : So, it was very important for their.....
Ugghh.....

P2 : Yes..... It was surprising that... no one Actually thought at first that like this kin
of songs can get into even American culture but, it actually get... because...you know it's.....
it's mix of... as...as much as I heard.... I don't heard much of hiphop. But as much as I
did.... it's actually mainly huge a lot of music actually

P1 : Yeah it's loud and...

P2 : Am I right???

P1 : It's very loud...very loud. Not like heavy Metal but still it's loud... I can't... I'm
actually agree with you. That it's actually loud.... actually.... but it was full... mainly
mixture of music and it's not actually.....doesn't actually follow..... you know.....
the old rules of music..... you know slow.It doesn't really follow up and the most
amazing thing is that it's famous approach the whole world because of the fact that most of
the other country people they are aactually following

P2 : Actually copying it.

P1 : They are copying..... copyingg this Hiphop thing in their own languages

P2 : And there's a lot of.... lot of bengali's Hiphop..... band or something..... and
That... I don't know what they called....

P1 : I'm not sure about this. But I think... I

Think rap music is a bit connected to it.

Am I right??

P2 : Yes yes...

P1: It's connected to hiphop and currently So, because it connected to hiphop now
Rap is also famous. So, Somehow hiphop Is....most of the time we hear you know...
the some part of the rap in hiphop. So it's actually famous! That's my opinion.....
and to be honest I'm not a big fan of hiphop

P2 : Me too. But... but the lot of people loving Hiphop music... and... and I have many
friends they love hiphop... they like hiphop.

P1 : So, to be honest I don't even remember the last time I listen a hiphop song.
So, can you actually tell me any song, a name of hiphopm... I actually to don't
remember.

P2 : I... I don't know...it... I listen slow Music, sad music. I like.... Actually I like
Slow music and sad music.... Rabindra Sangeet....

P1 : Okay that...

P2 : Nazrul....

P1 : Okay... but I don't listen bangla either. I like epic kind of categories song and
Band song... you know... pop songs...I not really into hiphop so I don't know
Much about hiphop so that's all I actually know about..... I don't even know which
singers are even categorized in this
category . because most of them....
singers in our current generation. They
had one or two or at least album over
hiphop.

P2 : I.... the different between hiphop and
band Music??

P1 : No no. Not band.I'm talking about Individual singers. Band doesn't follow
Hiphop. Not all the band actually. But Individual singers. They are actually
Following the trend. They release one or Two hiphop songs sometimes..... even

they even release album over hiphop songs. So, it's getting trend actually.

P2 : Okay, I think it's related... sure related

With hiphop or hiphop.

P1 : You can use bangla if you stuck.

P2 : I just try... let me try hiphop and rap song **Akhon (now)**

P1 : rap song and hiphop yes.. there is ****Related.... something related.

P2 : So, I think that we talked enough about Hiphop. We should get to the literature now. **-*-*
literature and the 1st thing is I'm not really good at that topic... because You know I'm not.... I
don't read much Away book. But as much as I know Because you are kind of literature. You

P1: I know you know anything about dram. You know You know the beat. I don't know the beat.

What is the beat?

P2: Beat means one kick.

P1: One kick?

P2: One kick is one beat, one snear and one snear is one beat. So sixteen beat near huge a sixteen
beat.

P1: Every single?

P2: Every single. Every single beat is a one beat. That why always use two legs and two hands
(sounds created using hands and legs).. like this sixteen beats.

P1: How many times they played that?

P1: Sixteen time ... sixteen beats..

P2: It's really hard.

P2: Oh nice.

P1: It's so easy.

P2: Not so critical. But the dramer always fixed your two hands two legs because aaaa.... When you used one youraaa...aaaa... when you used left hand your right hand always be down and down. Okay? **Toh bolte chacchilam ki (So I wanted to tell)**

P1: You can use Bengali when you don't speak the English.

P2: **baam haat jokhon norte thake, baam haat tokhon automatic chelaite thake (when the left hand shakes, the right hand shakes automaticly)** .Never stop it okay.

P1: You want to say that they always work with two hands?

P2: Yeah yeah. Always work with two hands and two legs always be...

P1: I think we should talk about the song the Scientist.

P2: I think it's friendly but sometimes not. Because we know many countries use it to harmful the people. That's why I think.... **majhe majhe eta dhoru poribesher jonne valo majhe majhe kharap. Je jei dik diye use kore ar ki. (sometimes its good for the environment, sometimes bad which depends on the way people use it)**

P1: I think its aaaaaa its aaaaaa harmful for environment aaaaaa or its makes some countries more Powerful and they eeee they want to they want to to **tara ye kore ei choto desh gular upor ekta provab bistar korar chesta kore (They try to influence small countries)** That's the bad thing of it.

P1: I used to read books but not more. But I read books. Aaa... books like some thriller books, aammmm some love stories and others. just normal kinds of books I read sometimes when I, whenever I got time. And I used to read books.

P2: My favourite writer... Now I don't have any specific favourite writer. I love everybody.

P2: well, research papers..they are not into literature. Like if you talk about Shakespeare, that's call literature. In bengali Sharatchandra.

I don't even understand what sharatchandra says his books.

P1: I never could relate to his emotions you knoww...the way he writes. I never could relate to get myself. Relate myself to it.

So I never understand what they were talking about. I just kept every book I have no got hold off.

P2: Well I have some, sharatchandras for decorating.

P1: There is one classical writer who is Promoth Cowdhury. His writing is really good.in

P2: well I haven't read much. so I can't judge like.. you know I have nothing to compare.. you know.

P1:But some people may Argue that Literature, reading literature can help you understand peoples behavior better. their emotions better, It can even make you happy, sad, or even inspire you to do something.

P2: But he believes that aliens exists.

P1: But yeah,he strongly believes. And he wonders like if one day the aliens those are more intelligent than us.

P2: come to us..

P1: yeah,,

P2: then what will we ask?

P1: yeah, what will we ask them?

So, how to summarize it? Should we make only one sentece summary?

P2: I don't know man. The passage seems to be so small.

P1: the passage actually seems to me a summary.

P2: yeah, that's the point.

P1: so basically we are writing a summary of a summary.

P2: Weird af man..it's weird af.

P1: yeah, it's weird.

okay

Okay so how to start?

P2: We should put a sentence like this. the summary of this passage is like this....bla bla bla..

P1: I don't think, I think it's needless to write you know.

P2: I am saying, will you say that or...

P1: Yeah, if we need it. We can say it. We can improvised it on spot.

P2: yeah.

P1: okay so.

P2: that's a diverse the possibility of aliens existence.

P1: yeah..let's let's..

P2: He mentioned that the movies we see that are green aliens but it's not..

P1: Yeah he highly doubts that those are green.

P2: Even I also doubt. How could i say that its green!!

P1: And he even doubts that they look like us. Look like the human ,right?

He thinks they are different.

P2: Aliens can be in any shape. Like you know, it can be liquid or something.

P1: liquid?

P2: Yah....

P1: yeah it can be tiny as bacterias or viruses..

P2: You know like jelly, I guess. Or Giant like...

P1: panda? Panda's are cute.anyway

P2: according to men in black ,aliens are everywhere.

P1: yep , and they are in every size.

P2: Yes.

P1: okay. Let's not go to the movies..

P2: talk about that.

P1: Because the writer disagrees with them. Anyway let's see this writer as a third person .So it will be better for us . Like let's write the writer wants this,the writer doesn't want that. Right?

P2: that's the key I guess.

P1: Okay , so are you gonna write? Or me?

P2: My handwriting sucks man.. You should write.

P1: all right... So here we are writing a summary of aliens. So what to write at first?

P2: The starting I told you, the summary means bloody hell,that shit....okay you should put

P1: okay,the...

P2: what...the summary of this passage...na ... the passage tells us about aliens I guess...

But what should we write?

P1: Now we are going to summarize the passage.

P2: Yeah, we should write..

P1: we should write it in passive

P2; The writer has strongly believe...

P1: Okay let's come to this part later. Let's go to the main frame..

P2: In the passage the writer believes that aliens do exist

P1: The writer strongly believes that aliens do...do?

We have already written strongly.so aliens exist

P2: Somewhere..

P1: somewhere out there in the space ,dark space...you should make it more dramatic,

P2: should we?

P1: yeah..why not?

P2: exist somewhere,,

P1: in the dark universe, dark space,

P2: You know I want to add the millions of planets here.So how can we add that?

P1: Exist....some of them in the millions of millions planets that have never been discovered.

P2: that doesn't dreamt,you know that doesn't sound grammatically correct...you knowww.

P1: yeah..the writer strongly believes that aliens exists with somewhere out there.

P2: okay.....(laughing..).

P1: Hi rakib.

P2: Hi Ishtiaq.

P1: what's up?

P2: so we have just listened to 3.. one minutes clip.

Topic are Hiphop, Literature and Nuclear energy. So let's talk about Hiphop first. I know you are more into music thing than me.

P1: Well.. I like rock and role and metal type of music. So I don't listen to that.

P2: So haven't you ever listen to any kind of hiphop musics.?

P1: well Sometimes I listen to Rappers like Eminem, Fifty cents.

P2: Fifty cents..okayy..

P1: Yeah.. he is a classic rapper. And I pretty much like *****, people hate him, But I like his style, Because he is unique.

P2: Okay, I have not that much to talk about..you know on hiphop... Because I have always listened to one band, that's Linkin Park.

And they do rock songs..

P1: To be honest, I got into rock & metal song by listening to Linkin Park. The first song That I have listened to is like in the end of Linkin park.

P2: Oh yes.. I too. High Five.

P1: yeah.. The next.. there is a song named Numb. right?

P2: I should have said me too instead of I. right?

P1: Yeah.

P2: okay doesn't matter.

You are talking about?

P1: yeah.I was talking about the song Numb. You have listened to numb?

P2: Yes I have.

P1: It pretty much matches to my life. you know.

P2: okay.

P1: well if you have to...

P2: I recently Linkin Park has introduced to some pop music singers...

P1: Well they started Like you know... The **** a new metal then they shifted to pop. well their was a new****-

P2: Theirs lot much to learn in the hiphop right?

so basically I was saying that I have always been to some linkin park. And not much more songs.. So I can not Differentiate even what is hipo hop and...

P1: Well we don't have anything to comparison.. right?

P2: Yes that's the problem. i feel inadequate knowledge I have.

P1: To be honest I don't like hiphop. we are just mumbling and rapping like, without any.. you will just let a peacy or think to make music right?

There is no purity about... And you are just you know,, wearing some loose pants and something..

P2: Like chains..

P2:some chains and you know caps behind you.. you knoww like..

P1: Caps facing the back.

P2: yeah.

P1: Yeah I just think that they are more artificial.

So I think we don't have much to talk about. Because we both are kind of illiterate about the topic.So let's move on to the next topic.

P2: Yeah. listen to the song, like Abar jigay.

P1: Yeah. That's Bangla Hiphop. That's was a trend.

P2: That time it was pretty much famous.

P1: Okay. So let's move on to the next topic which is literature.

P2: Yeah the boring one.

P1: What's your thought on literature? may I know?

P2: Well to be honest..Scientists have proven I have already told you that..

P1: Yes you told me yesterday.

P2: Scientists have proven that literature slows our mind.

P1: But you know the literature You Are talking about is a part of literature.. Like fiction things Not, you know every kind of literature. No fiction is a kind of literature. And there are things you can say like research papers.. are they into literature?

I don't know but..

P2: well, research papers..they are not into literature. Like if you talk about Shakespeare, that's call literature. In bengali Sharatchandra.

I don't even understand what sharatchandra says his books.

P1: I never could relate to his emotions you knoww...the way he writes. I never could relate to get myself. Relate myself to it.

So I never understand what they were talking about. I just kept every book I have no got hold off.

P2: Well I have some, sharatchandras for decorating.

P1: There is one classical writer who is Promoth Cowdhury. His writing is really good.in

P2: well I haven't read much. so I can't judge like.. you know I have nothing to compare.. you know.

P1:But some people may Argue that Literature, reading literature can help you understand peoples behavior better. their emotions better, It can even make you happy, sad, or even inspire you to do something.

P2: Well it plays with your emotion. right.?

P1: Yes.

P2: Like you are reading a nobel, you are that person.Like.. Ami topu right.
